Sub Category

Subject Security server at DAACs

Actionee HAIS

Description of Problem or Suggestion:

The security server (DCE and/or kerberos) should be a dedicated server with no other services or user access to it. This is not the case in the current proposed hardware configurations. Replica servers can be run on systems running other services.

Originator's Recommendation

Revise configurations to address this concern. NOTE: "small workstation configuration" is sufficient to meet loading requirements.

GSFC Response by: **GSFC Response Date**

HAIS Response by: Forman   **HAIS Schedule** 2/28/95

HAIS R. E. Wheatly   **HAIS Response Date** 2/28/95

The response to this RID is incorporated into the response for RID 248.
